

AHAMED NASITH S

FRONTEND DEVELOPER | REACT.JS | NEXT.JS

sahamednasith2003@gmail.com | +91 8682904884 | [LinkedIn](#) | [GitHub](#) | [Website](#)

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building responsive web applications and business-focused SaaS modules using React.js, Next.js, and JavaScript. Experienced in independently developing frontend modules including real-time chat, CRM, helpdesk, forms, organizational interfaces, and dashboards. Strong in REST API integration, Socket.IO, Tailwind CSS, and third-party integrations, with practical experience building and maintaining production web applications.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS
- **APIs & Integrations:** REST APIs, Axios, Socket.IO, Third-Party API Integration
- **UI & Visualization:** Responsive Web Design, Framer Motion, ApexCharts
- **Tools & Deployment:** Git, npm, Vercel

PROFESSIONAL EXPERIENCE

Pepul Tech Pvt. Ltd. — Chennai, Tamil Nadu, India

Web Developer / Frontend Developer | June 2023 – Present

Product: Workfast.ai

- Served as the primary frontend developer, independently delivering frontend modules for a production productivity and business application while collaborating with full-stack developers for backend integration.
- Built complete frontend experiences for modules including real-time **Chat**, **CRM**, **Helpdesk**, **Forms**, **CXO**, **Home**, and **Organization Chart** interfaces.
- Developed a real-time Chat module using **Socket.IO**, including interactive features such as voice recording and waveform visualization.
- Integrated REST APIs and third-party services using **Axios**, including **WhatsApp integration** through Meta and payment providers such as **Razorpay**, **Stripe**, and **Lemon Squeezy**.
- Implemented complex business interfaces including **organizational hierarchy views**, **dynamic forms**, **feedback** and **ticketing workflows**, and data visualization using **ApexCharts**.
- Took ownership of existing **frontend modules**, **handling feature updates**, **bug fixes**, and ongoing maintenance for inherited sections of the application.
- Fully developed responsive websites including **Workfast.ai**, **Surge Startups**, **100 Startups**, and **Rainbow Trucks**, translating complete Figma designs into production-ready frontend experiences.

SELECTED PROJECT

First Gen Digital | Independent Project

- Independently developed the complete frontend for the First Gen Digital website.
- Built and delivered a responsive web experience as an independent project outside of primary professional work.
